

FLSA OVERTIME RULE RISK SCORECARD

On May 18, 2016, the U.S. Department of Labor (DOL) released a new rule that will more than double the salary threshold that employees must meet in order to qualify for an overtime wage payment exemption—a change that could affect more than 4 million workers across the United States.

Failure to comply with the Fair Labor Standards Act (FLSA) can result in lawsuits, criminal charges, fines and restrictions in commerce. A low score does not mean that your organization

is necessarily in compliance. This tool simply makes a general estimate of risk.

Answer the following questions to determine whether your organization is at risk for increased costs, fines and lawsuits.

INSTRUCTIONS: Begin by answering the questions below. Each response will be given a numerical value depending on the answer. After completing the questions, total your score using the scale at the bottom of the page.
